Our New Factory at Surry Hills

THE opening of our new factory takes place to-day, and is undoubtedly one of the most important events of the week.

SEE where we manufacture. The place that will enable us to continue on a LARGER scale SAVING YOU TWO PROFITS

HOW WE SAVE YOU TWO PROFITS!

Souvenir Week at David Jones

(EVERY WINDOW IS SHOWING OUR AUSTRALIAN MANUFACTURED GOODS)

EVERYONE, especially ladies, is naturally desirous of making a saving in the cost of their purchases if this can be achieved without the sacrifice of QUALITY. It is therefore highly interesting to know how this saving can be effected. The method is here explained.

FIRSTLY, we buy our goods direct from the Mills, thus eliminating the wholesaler's profit.

SECONDLY, we make the goods in our own factory, consequently there is no manufacturer's profit. To more fully explain—We make up the goods ourselves in our own factory, and we make no profit on them as manufacturers. We are content with the profit we make when we sell the goods to you over the counter.

We are not, therefore, peddling as philanthropists, and we believe, by adopting the method explained, that it will be to our mutual advantage. We should point out, however, that this method of manufacturing the goods ourselves is not new to the company, but we feel that now we have concentrated all our employees connected with manufacturing in one place, that it is an opportunity time to force home to the buying public's mind that WE ARE MANUFACTURERS.

With this object in view, and to celebrate the opening of our new factory, we are this week giving a number of Souvenir Lines at Special Prices. Particulars of these will be found below.

MONDAY (only)

AUSTRALIAN MANUFACTURES WEEK

ALL AUSTRALIAN. WEALTH OF MANUFACTURE'S WEEK'S EXPOSITION.

Today goods manufactured from Australia will be on view, and at the Railway Station there will be a brand new locomotive just turned out from the workshops, together with two of the latest sleeper carriages.

In the Chalmers House windows the Defence Department will make an interesting display with rifles from the Small Arms Factory, showing the weapons in various stages of manufacture, as well as stands of rifles made from old glass, Tannianian muffs and for purposes of ornamentation in the wall.

A feature of the display in the windows will be the work of the Technical College students—manufacturers in the making—who, under the direction of Mr. Naughton, are exhibiting enthusiastically in the exhibition.

At Circular Quay will be three military wagons made for the defence forces, they are an armoured machine, an armoured motor, and an armoured wagon, all ready for service. Here also will be seen loads of goods, some from the State Brick Works, and the other from a private kiln.

THE PROGRAMME. ROUND OF FESTIVITIES.

Two years ago, when the Chamber of Commerce arranged "Manufactures Week," the chief spectacular item was a procession through the streets of Sydney, in which many of the manufacturers were represented, and the huge wagons bore loads of Australian-made goods in various stages of manufacture. This time there will be no procession. But the Australian goods will be on show in every window in the metropolis, while special exhibits will be presented in Chalmers House, at the railway station, and in front of the Customs-house.

Today there will be a luncheon attended by representative citizens, at Surrey Hills, to celebrate the opening of Messrs. David Jones' new factory, which is the largest of its kind in Australia, and will be open to the public from May 11 to May 15, when it is to be held in the York Hotel, attended by the Governor, the Premier, the Lord Mayor, and the members of the Chamber of Manufacturers.

On Thursday the Chamber of Manufacturers will hold a luncheon at the York Hotel, and on Friday evening, at the Commercial Travellers' Club, a special smoke night will be held, and the manufacturers of the commerce and knights of the road will extend the virtues of Australian manufactures.

GROWTH OF OUR FACTORIES. SOME STARTLING FIGURES. NEARLY £7,000,000.

While the growth of primary industries in New South Wales has been so great as to win flattering tributes from admirers of the man on the land, the progress in manufacturing—especially in recent years—has been equally praiseworthy.

And while there is romance in the achievement, and the pioneers who blazed the track, there is no less romance in the song of the factory, and the ceaseless industrial, and in the

interests for the future. The fact that the growth of manufacturing in New South Wales has been so great as to win flattering tributes from admirers of the man on the land, the progress in manufacturing—especially in recent years—has been equally praiseworthy.

And while there is romance in the achievement, and the pioneers who blazed the track, there is no less romance in the song of the factory, and the ceaseless industrial, and in the

THE PRESIDENT.

The president of the New South Wales Chamber of Manufacturers, and president and head of the organization that is conducting the All Australian Manufactures Week, is Mr. H. E. Pratton. He has been actively associated with the movement since its inception.

MACHINERY.

PLANT AND WORKS.

£28,000,000 INVESTED.

When the average business man travels from his home to his office in the morning and back again in the evening, he may see a few big factories, but unless his work takes him amongst the whirling wheels he has little idea of the tremendous amount of money invested in the State manufacturing plant.

Today the plant and machinery used in New South Wales represents a capital of approximately £28,000,000, while the value of the buildings and fixtures is scarcely less, roughly £12,500,000. The factories with machinery increased in number from 1880 to 1900 to about 1000 last year. In 1880 the value of the plant and machinery was £1,000,000, and in 1900 it was £5,000,000, and in the last ten years the amount almost doubled. The progress of manufacturing in New South Wales is shown in the following table at the accompanying table—

Year.	Metropolis.	Remainder of State.	Total.
1880	1,000	1,000	2,000
1890	1,500	1,500	3,000
1900	2,000	2,000	4,000
1910	2,500	2,500	5,000
1912	2,600	2,600	5,200

SONG OF STEAM.

For manufacturing purposes, steam is the power of the lower world, and it is the power of the lower world that is the power of the lower world. It is the power of the lower world that is the power of the lower world. It is the power of the lower world that is the power of the lower world.

Year.	Metropolis.	Remainder of State.	Total.
1880	1,000	1,000	2,000
1890	1,500	1,500	3,000
1900	2,000	2,000	4,000
1910	2,500	2,500	5,000
1912	2,600	2,600	5,200

It is very interesting to note how the manufacturing industry has grown in New South Wales. The value of the plant and machinery has increased from £1,000,000 in 1880 to £28,000,000 in 1912. This is a growth of 28 times in 32 years. The number of factories has increased from 2,000 in 1880 to 5,200 in 1912. This is a growth of 2.6 times in 32 years.

The senior vice-president of the Chamber of Manufacturers is one of the most progressive and popular members of the council. He is a director of several manufacturing concerns in the metropolis. For years he has been a prominent member of the Chamber of Commerce and the Employers' Federation.

The relatively small increase in the number of factories in New South Wales is due to the fact that the State in 1901 and 1902 experienced one of the worst droughts on record, and the consequent restriction of primary production reacted in a marked degree upon the secondary industries. But the recuperative powers of the State were demonstrated in the next quinquennial period. The great increase from 1906 to 1912 showed that the State without the aid of a high protective tariff had forced ahead in such a manner that the manufacturing industry had recovered to the extent of 35 per cent.

While the increase in the metropolis has been so great as to cause alarm to political economists, the growth in the rest of the State has been by no means insignificant, though to be sure under the classification "Remainder of the State" are included such urban centres as Newcastle, Broken Hill, Gold, Narrabri, Orange, and Albury. But the attractions which the metropolis has for the fact that whereas the number of employees in the metropolis increased by over 10,000, or 31 per cent, since 1905, the increase for the rest of the State was only 11,000, or 47 per cent.

LOCOMOTIVE BUILT AT EVELLIGH AND TO BE EXHIBITED AT THE CENTRAL STATION.

AN APPEAL. "CULTIVATE PATRIOTISM."

With a view to a record celebration of All Australian Manufactures Week, the Chamber of Manufacturers of New South Wales, in conjunction with the Chamber of Manufacturers of the other States, has issued the following appeal:

It has been decided to hold the "All Australian Manufactures Week" this year, from May 11 to May 15, when it is to be held in the York Hotel, attended by the Governor, the Premier, the Lord Mayor, and the members of the Chamber of Manufacturers.

On Thursday the Chamber of Manufacturers will hold a luncheon at the York Hotel, and on Friday evening, at the Commercial Travellers' Club, a special smoke night will be held, and the manufacturers of the commerce and knights of the road will extend the virtues of Australian manufactures.

The displays in the windows of the shops will be a feature of the week. Everything that man, woman, and child need in the way of food and clothing will be on show. Hats, shoes, and garments of all kinds, hats, millinery, textiles, and all the trappings of the domestic life will be on display. This is a very important feature of the week, and it is one that should not be overlooked.

the harnessing of the half-tamed forces of nature to work the will of man. And so the record of manufacturing enterprise in New South Wales is a romantic story of a great achievement. A hundred years ago manufactures were practically non-existent. Today over 500 industrial concerns, with plant and machinery valued at over 10 millions sterling, turn out manufactures to the value of £20,000,000 a year. Their pay-sheet to employees reaches £12,500,000.

These figures, read easily enough off the tongue, and in the Government Statisticians' records they appear as the natural corollary of the slightly smaller figures which precede them. But they give an adequate idea of the industry of the arm of workers which labour makes these figures possible. To grasp the significance of it all, one needs to visualize old Sydney with its primitive means, and still more primitive means of providing for them, and then gradually trace the growth of the metropolis and its industries.

So, way back in 1810, we find that the manufacturing establishments included a few carpenter's shops, a pottery, a tannery, a brewery, a place where tobacco pipes were made, and a factory for making coarse woollen cloth. Everything that man, woman, and child need in the way of food and clothing will be on show. Hats, shoes, and garments of all kinds, hats, millinery, textiles, and all the trappings of the domestic life will be on display. This is a very important feature of the week, and it is one that should not be overlooked.

But in 1848 there was a noticeable advance, and the number of establishments had increased to 172. The great increase from 1848 to 1912 showed that the State without the aid of a high protective tariff had forced ahead in such a manner that the manufacturing industry had recovered to the extent of 35 per cent.

While the increase in the metropolis has been so great as to cause alarm to political economists, the growth in the rest of the State has been by no means insignificant, though to be sure under the classification "Remainder of the State" are included such urban centres as Newcastle, Broken Hill, Gold, Narrabri, Orange, and Albury. But the attractions which the metropolis has for the fact that whereas the number of employees in the metropolis increased by over 10,000, or 31 per cent, since 1905, the increase for the rest of the State was only 11,000, or 47 per cent.

The displays in the windows of the shops will be a feature of the week. Everything that man, woman, and child need in the way of food and clothing will be on show. THE INDUSTRIAL ARMY.

120,000 EMPLOYEES.

PAY SHEET £12,500,000.

Last year the manufacturers' pay-sheet in New South Wales amounted to over £12,500,000, and this was shared between about 120,000 employees—men, women, and juveniles.

This paid statement shows what an army of workers is employed in the secondary and manufacturing industries.

In Sydney alone the number of workers has increased by 75 per cent. in the last ten years. This is a record of progress, which it is doubtful if any city in the world can equal. And while the growth of the manufacturing industry has been so great as to cause alarm to political economists, the growth in the rest of the State has been by no means insignificant, though to be sure under the classification "Remainder of the State" are included such urban centres as Newcastle, Broken Hill, Gold, Narrabri, Orange, and Albury. But the attractions which the metropolis has for the fact that whereas the number of employees in the metropolis increased by over 10,000, or 31 per cent, since 1905, the increase for the rest of the State was only 11,000, or 47 per cent.

MEXICO.

BREACH OF ARMISTICE ALLEGED.

HUERTA RESENTFUL.

OIL WELLS FIRED.

WASHINGTON, May 8.

President Huerta has informed the South American mediators that the United States Government at Vera Cruz has broken the armistice.

Officials of the State Department state that the armistice has not yet been formally broken, but breach is possible. The United States, they assert, merely agreed to the armistice on condition that necessary measures be taken to prevent a breach.

It is reported that Mexican troops have fired on the Tampico oil wells.

It is understood that the War Department is preparing to dispatch reinforcements to the Tampico oil wells.

A Mexican City in the Huerta regime has been reported to have been captured.

GARRAZAN'S CAMPAIGN.

General Garza, the Constitutional leader, has notified Mr. Bryan (Secretary of State) that he now regards the American occupation of Vera Cruz as directed against the people.

Garza is acting promptly, with the object of pressing his campaign against Tampico.

REBEL SUCCESS.

MATIAS, May 8.

The capture of San Luis de Potosi is reported.

General Zapata's followers have captured the capital of the State of Morelos.

Other rebel successes are also notified.

MEDIATION CONFERENCE.

WASHINGTON, May 8.

Preparations for the mediation conference to be held in Canada, are now complete.

The Mexican envoys, Senor Robles and Senor Carrasco, are preparing to leave Mexico City.

CONTRABAND OF WAR.

A German steamer, laden with munitions of war, was captured off the coast of Mexico.

The steamer was bound for Puerto Mexico. The United States authorities plan to return the cargo to Germany.

Another steamer with a similar cargo is expected, but it is believed that she will not be allowed to land supplies.

CORRESPONDENTS SET FREE.

Two English war correspondents, named Burke and Huffer, and an American pressman, who were arrested at Mexico City, were released after Sir Lionel Clouston, British Minister in Mexico, had protested to President Huerta on their behalf.

RIVAL EXPLORERS.

ROOSEVELT AND LANDOR.

LONDON, May 8.

Mr. Roosevelt, who intends to explore the interior of Mexico, has been informed by Sir Lionel Clouston, British Minister in Mexico, that he is not to be allowed to enter the country.

Mr. Landor, who has been exploring the interior of Mexico, has been informed by Sir Lionel Clouston, British Minister in Mexico, that he is not to be allowed to enter the country.

BITTER DISPUTE.

ROOSEVELT AND LANDOR.

LONDON, May 8.

Mr. Roosevelt, who intends to explore the interior of Mexico, has been informed by Sir Lionel Clouston, British Minister in Mexico, that he is not to be allowed to enter the country.

Mr. Landor, who has been exploring the interior of Mexico, has been informed by Sir Lionel Clouston, British Minister in Mexico, that he is not to be allowed to enter the country.

AUSTRIAN FLAG BURNED.

VIENNA, May 8.

Many anti-Austrian brawls occurred at Vienna, Prague and Milan. Students burned the Austrian flag in St. Mark's square, Venice.

The British flag was also burned in St. Mark's square, Venice.

FEELING IN ITALY.

VIENNA, May 8.

Many anti-Austrian brawls occurred at Vienna, Prague and Milan. Students burned the Austrian flag in St. Mark's square, Venice.

The British flag was also burned in St. Mark's square, Venice.

HOME RULE.

ARMY OFFICERS AND ULSTER OFFICIAL CONVERSATIONS.

LONDON, May 8.

A memorandum which has been published giving the conversations in connection with the Ulster question, took place between Lord Curzon, Secretary of State for Foreign Affairs, and Sir John French, Chief of the Imperial General Staff, is published.

The memorandum, which is published in the "Morning Post," shows that Sir John French strongly favoured the Ulster question, and that Lord Curzon, on the other hand, was strongly opposed to it.

The memorandum also shows that Lord Curzon was strongly opposed to the Ulster question, and that Sir John French, on the other hand, was strongly in favour of it.

SICILIAN EARTHQUAKE.

HEAVY CASUALTIES.

VICTIMS BURIED IN RUINS.

ROME, May 10.

An earthquake severely damaged several villages in the neighbourhood of Agrigento, Sicily, on the morning of the 10th inst.

Doctors and nurses, with tents, were dispatched to aid the injured and succour the homeless. Many small villages were destroyed, and it is expected that the total casualties will be very heavy.

Santa Caterina, which has a population of 215, was destroyed, and hundreds of houses and churches collapsed elsewhere. The volcano Etna is increasingly active.

Tremors have been felt in the vicinity of Agrigento for a fortnight past. Several shocks were experienced on Thursday, reaching their maximum on Friday evening. The shocks equalled in intensity those which destroyed Messina at the beginning of 1908.

Many hundreds of people are dead. At least 1000 were injured at the town of Catania. There were no fatalities or damage at the town of Agrigento itself.

Forty bodies were recovered at the village of Lincara, which was completely destroyed, and its ruins are still visible in the debris.

The railway line was torn up for 700 yards. Four hundred tons have been sent to render help and preserve order.

ROYAL VISIT.

ENGLAND AND DENMARK.

LONDON, May 10.

The Prince of Wales, accompanied by the King and Queen of Denmark, arrived at Victoria Station, London, on the morning of the 10th inst.
